CONSTRUCTION NOTICE (8/29/2014)
WATER STREET RECONSTRUCTION

The Town of Spencer will be performing water main replacement work and administering a major roadway resurfacing and sidewalk reconstruction contract impacting Water Street beginning in September and continuing through to November. Our goal is to complete the project as quickly as possible and to minimize disruptions as much as possible; however, the variables of weather or other unforeseen conditions could adversely affect any planned completion date.

The Water Street roadway will undergo a cold-planing and resurfacing. This means we will grind 1.5" off of the existing road surface and pave the new surface course. In addition, the sidewalks and curbing will be removed and replaced. We will also rework some or all of the driveways to smoothly blend with the new work. All work with the possible exception of driveway blending will occur on town property.

Daily road closures will be in effect. Residents should plan alternate routes around the construction site based upon daily construction zones. The road closure zone will continue to shift daily as construction progresses. When construction crews are in the area please remove vehicles from the street by 7:00 AM each day to help speed up construction.

We appreciate your patience during construction, if there are any questions please contact our office at 508-885-7525. Thank you in advance for your understanding and cooperation.

Sincerely,

Steven J. Tyler, P.E., Superintendent
Spencer Water Department / Utilities and Facilities Office
